

Where children are born can affect their chances for a strong start in life. Babies need Good Health, Strong Families, and Positive Early Learning Experiences to foster their healthy brain development and help them realize their full potential.

This state profile provides a snapshot of how infants, toddlers, and their families are faring in each of these three policy domains. Within each domain, view data for selected child, family, and policy indicators compared to national averages. The profile begins with a demographic description of the state's babies and families to offer the broadest context for exploring what may be very different experiences of the state's youngest children.

Infants and toddlers in North Dakota

Overview

North Dakota is home to 32,926 babies, representing 4.3 percent of the state's population. As many as 33.6 percent live in households with incomes less than twice the federal poverty line (in 2018, about \$50,000 a year for a family of four), placing them at economic disadvantage. America's youngest children are diverse and are raised in a variety of family contexts. In North Dakota, 26.2 percent of babies are children of color and 30.9 percent of the state's infants and toddlers live in rural areas. A broad array of policies and services are required to ensure all of them have an equitable start in life.

What is Good Health?

Good physical and mental health provide the foundation for babies to develop physically, cognitively, emotionally, and socially. The rate of brain growth is faster in the first 3 years than at any later stage of life, and this growth sets the stage for subsequent development. Access to good nutrition and affordable maternal, pediatric, and family health care is essential to ensure that babies receive the nourishment and care they need for a strong start in life.

North Dakota falls in the Reaching Forward (R) tier for the Good Health domain. A state's ranking is based on indicators of maternal and child health, including health care coverage, prenatal care, birth outcomes, and receipt of recommended preventive care as well as food security, nutrition, and mental health. North Dakota performs better than national averages on key indicators, such as a lower infant mortality rate and the percentage of babies receiving recommended vaccinations. The state is performing worse than national averages on indicators such as the percentages of uninsured babies in families with low income and mothers reporting less than favorable mental health. North Dakota is a Medicaid expansion state. The state Medicaid program covers 5 of 5 screenings and services that support socioemotional well-being and maternal and infant and early childhood mental health (IECMH).

Six Key Indicators of Good Health

Good Health Policy in North Dakota

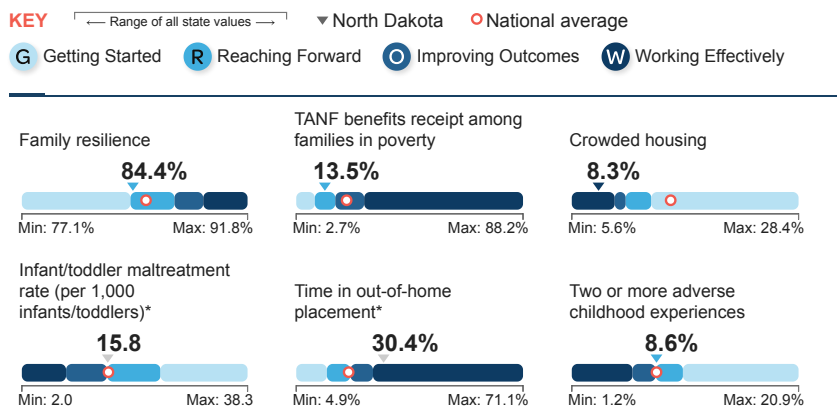

Medicaid expansion state	Yes <input checked="" type="checkbox"/>
State Medicaid policy for maternal depression screening in well-child visits	Recommended
Medicaid plan covers social-emotional screening for young children	Yes <input checked="" type="checkbox"/>
Medicaid plan covers IECMH services at home	Yes <input checked="" type="checkbox"/>
Medicaid plan covers IECMH services at pediatric/family medicine practices	Yes <input checked="" type="checkbox"/>
Medicaid plan covers IECMH services in early childhood education settings	Yes <input checked="" type="checkbox"/>

What Defines Strong Families?

Young children develop in the context of their families, where stability, safety, and supportive relationships nurture their growth. All families benefit from parenting supports, and many—particularly those challenged by economic instability—require access to additional resources that help them meet their children's daily and developmental needs. Key supports include safe and stable housing, home visiting services, family-friendly employer policies, economic support for families with low income, and tax credits that benefit families with young children.

North Dakota falls in the Getting Started (G) tier of states when it comes to indicators of Strong Families. The state's ranking in this domain reflects indicators on which it is performing better than the national average, such as the percentages of babies living in crowded housing and parents who report living in unsafe neighborhoods. North Dakota is doing worse than the national average on indicators such as the percentages of families in poverty with babies receiving TANF and babies exiting foster care to permanency. Policy-wise, the state has implemented none of 5 policies that promote strong families, such as paid sick and family leave, Temporary Assistance to Needy Families (TANF) options, the Child Tax Credit, and Earned Income Tax Credit.

Six Key Indicators of Strong Families

Strong Families Policy in North Dakota

Paid family leave	No <input checked="" type="checkbox"/>
Paid sick time that covers care for child	No <input checked="" type="checkbox"/>
TANF Work Exemption	No <input checked="" type="checkbox"/>
State Child Tax Credit	No <input checked="" type="checkbox"/>
State Earned Income Tax Credit (EITC)	No <input checked="" type="checkbox"/>

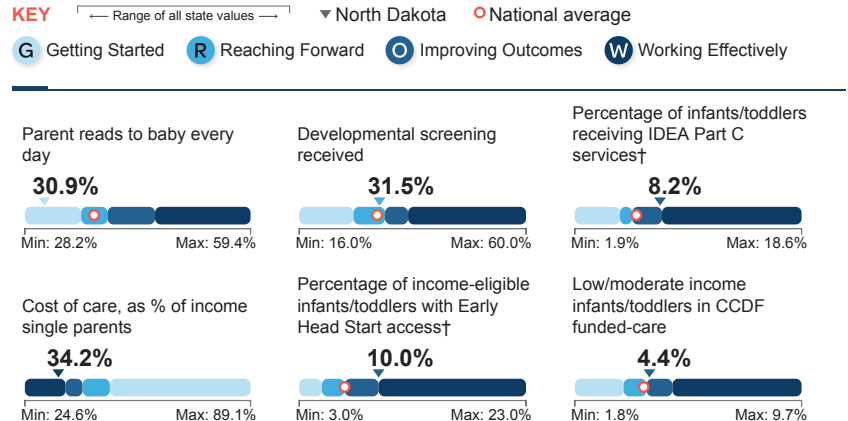

What Defines Positive Early Learning Experiences?

Infants and toddlers learn through play, active exploration of their environment, and, most importantly, through interactions with the significant adults in their lives. The quality of babies' early learning experiences at home and in other care settings impacts how prepared they are for life-long learning and success. Parents who work or attend school require access to affordable, high-quality care options that foster their babies' development. During this rapid period of growth, access to screening and early intervention is essential to address potential developmental delays.

North Dakota scores in the Improving Outcomes (O) tier for Positive Early Learning Experiences. The state's ranking in this domain reflects indicators on which it is performing better than the national average, such as the higher percentages of income-eligible babies with access to Early Head Start and babies who receive IDEA Part C services. North Dakota is doing worse than the national average on indicators such as the lower percentages of parents who read and sing/tell stories to their babies daily. Infant care costs as a percentage of the state's median income for single and married parents also contribute to the ranking. The state offers child care subsidy assistance to families with incomes above 200 percent of the Federal Poverty Level.

Six Key Indicators of Positive Early Learning Experiences

Positive Early Learning Experiences Policy in North Dakota

Families above 200% of FPL eligible for child care subsidy	Yes <input checked="" type="checkbox"/>
Allocated CCDBG funds	No <input checked="" type="checkbox"/>
Group size requirements meet or exceed EHS standards	No age group
Adult/child ratio requirements meet or exceed EHS standards	1 age group
Level of teacher qualification required by the state	High school diploma
Infant/toddler credential adopted	No <input checked="" type="checkbox"/>
State reimburses center based child care at/above 75th percentile of market rates	No <input checked="" type="checkbox"/>
State includes 'at-risk' children as eligible for IDEA Part C services	No <input checked="" type="checkbox"/>
