

Where children are born can affect their chances for a strong start in life. Babies need Good Health, Strong Families, and Positive Early Learning Experiences to foster their healthy brain development and help them realize their full potential.

This state profile provides a snapshot of how infants, toddlers, and their families are faring in each of these three policy domains. Within each domain, view data for selected child, family, and policy indicators compared to national averages. The profile begins with a demographic description of the state's babies and families to offer the broadest context for exploring what may be very different experiences of the state's youngest children.

Demographics

Infants and toddlers in Rhode Island

Overview

Rhode Island is home to 32,465 babies, representing 3.1 percent of the state's population. As many as 41.7 percent live in households with incomes less than twice the federal poverty line (in 2018, about \$50,000 a year for a family of four), placing them at economic disadvantage. America's youngest children are diverse and are raised in a variety of family contexts. In Rhode Island, 45.0 percent of babies are children of color and less than 1 percent of the state's infants and toddlers live in rural areas. A broad array of policies and services are required to ensure all of them have an equitable start in life.

What is Good Health?

Good physical and mental health provide the foundation for babies to develop physically, cognitively, emotionally, and socially. The rate of brain growth is faster in the first 3 years than at any later stage of life, and this growth sets the stage for subsequent development. Access to good nutrition and affordable maternal, pediatric, and family health care is essential to ensure that babies receive the nourishment and care they need for a strong start in life.

Rhode Island falls in the Working Effectively (W) tier for the Good Health domain. A state's ranking is based on indicators of maternal and child health, including health care coverage, prenatal care, birth outcomes, and receipt of recommended preventive care as well as food security, nutrition, and mental health. Rhode Island performs better than national averages on key indicators, such as the percentages of women receiving late or no prenatal care and babies receiving recommended vaccinations. The state is performing worse than national averages on indicators such as the percentages of babies ever breastfed and does not extend Medicaid eligibility to pregnant women with income at or above 200 percent of the federal poverty level. Rhode Island is a Medicaid expansion state. The state Medicaid program covers 5 of 5 screenings and services that support socioemotional well-being and maternal and infant and early childhood mental health (IECMH).

Six Key Indicators of Good Health

Good Health Policy in Rhode Island

Medicaid expansion state	Yes <input checked="" type="checkbox"/>
State Medicaid policy for maternal depression screening in well-child visits	Recommended
Medicaid plan covers social-emotional screening for young children	Yes <input checked="" type="checkbox"/>
Medicaid plan covers IECMH services at home	Yes <input checked="" type="checkbox"/>
Medicaid plan covers IECMH services at pediatric/family medicine practices	Yes <input checked="" type="checkbox"/>
Medicaid plan covers IECMH services in early childhood education settings	Yes <input checked="" type="checkbox"/>

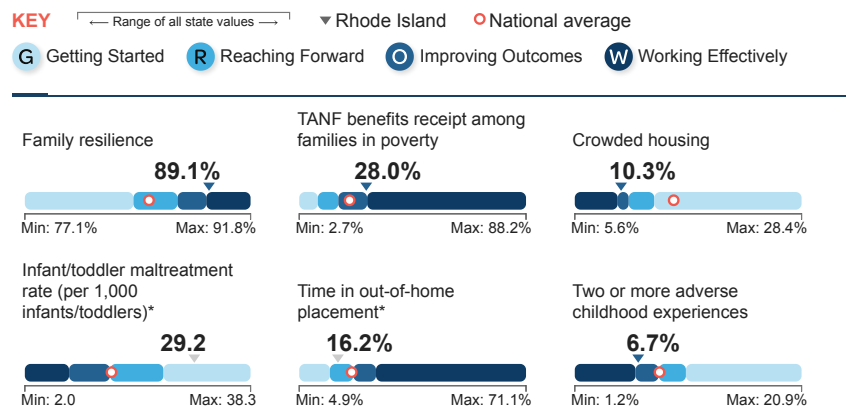

What Defines Strong Families?

Young children develop in the context of their families, where stability, safety, and supportive relationships nurture their growth. All families benefit from parenting supports, and many—particularly those challenged by economic instability—require access to additional resources that help them meet their children's daily and developmental needs. Key supports include safe and stable housing, home visiting services, family-friendly employer policies, economic support for families with low income, and tax credits that benefit families with young children.

Rhode Island falls in the Working Effectively (W) tier of states when it comes to indicators of Strong Families. The state's ranking in this domain reflects indicators on which it is performing better than the national average, such as the percentages of families in poverty with babies receiving TANF and babies who have had one adverse experience. Rhode Island has no indicators that rank worse than the national average. Policy-wise, the state has implemented 4 of 5 policies that promote strong families, such as paid sick and family leave, Temporary Assistance to Needy Families (TANF) options, the Child Tax Credit, and Earned Income Tax Credit.

Six Key Indicators of Strong Families

Strong Families Policy in Rhode Island

Paid family leave	Yes <input checked="" type="checkbox"/>
Paid sick time that covers care for child	Yes <input checked="" type="checkbox"/>
TANF Work Exemption	Yes <input checked="" type="checkbox"/>
State Child Tax Credit	No <input type="checkbox"/>
State Earned Income Tax Credit (EITC)	Yes <input checked="" type="checkbox"/>

Positive Early Learning Experiences

In Rhode Island

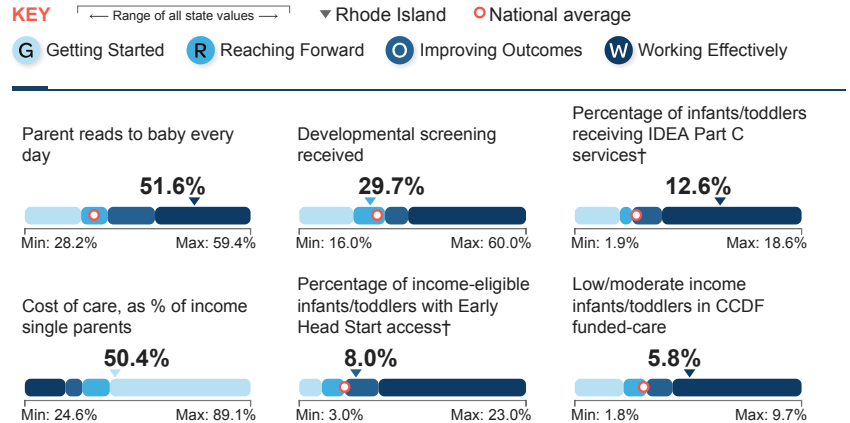

What Defines Positive Early Learning Experiences?

Infants and toddlers learn through play, active exploration of their environment, and, most importantly, through interactions with the significant adults in their lives. The quality of babies' early learning experiences at home and in other care settings impacts how prepared they are for life-long learning and success. Parents who work or attend school require access to affordable, high-quality care options that foster their babies' development. During this rapid period of growth, access to screening and early intervention is essential to address potential developmental delays.

Rhode Island scores in the Working Effectively (W) tier for Positive Early Learning Experiences. The state's ranking in this domain reflects indicators on which it is performing better than the national average, such as the higher percentages of parents who read to their babies daily and babies who receive IDEA Part C services. Rhode Island is doing worse than the national average on indicators such as the lower percentage of babies who received developmental screening. Infant care costs as a percentage of the state's median income for single and married parents also contribute to the ranking. The state does not offer child care subsidy assistance to families with incomes above 200 percent of the Federal Poverty Level.

Six Key Indicators of Positive Early Learning Experiences

Positive Early Learning Experiences Policy in Rhode Island

Families above 200% of FPL eligible for child care subsidy	No <input checked="" type="checkbox"/>
Allocated CCDBG funds	Yes <input checked="" type="checkbox"/>
Group size requirements meet or exceed EHS standards	1 age group
Adult/child ratio requirements meet or exceed EHS standards	1 age group
Level of teacher qualification required by the state	High school diploma
Infant/toddler credential adopted	No <input checked="" type="checkbox"/>
State reimburses center based child care at/above 75th percentile of market rates	No <input checked="" type="checkbox"/>
State includes 'at-risk' children as eligible for IDEA Part C services	No <input checked="" type="checkbox"/>
