

# The State of South Dakota's Babies R

Where children are born can affect their chances for a strong start in life. Babies need good health, strong families, and positive early learning experiences to foster their healthy brain development and help them realize their full potential.

This state profile provides a snapshot of how infants, toddlers, and their families are faring in each of these three policy domains. Within each domain, view data for selected child, family, and policy indicators compared to national averages. The profile begins with a demographic description of the state's babies and families to offer the broadest context for exploring what may be very different experiences of the state's youngest children.

## Demographics

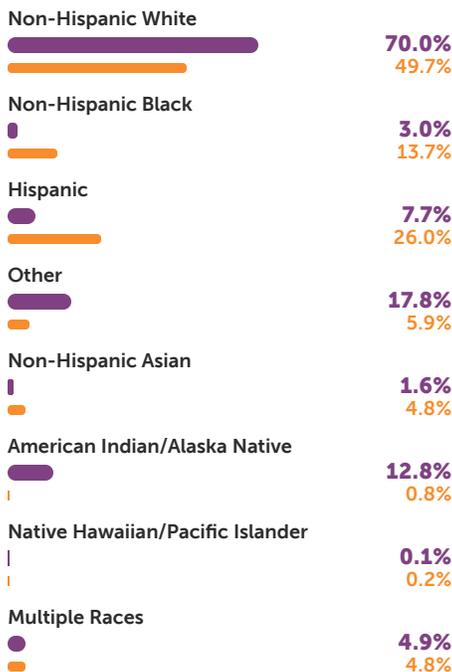

● South Dakota ● National Average

### Infants and toddlers in South Dakota

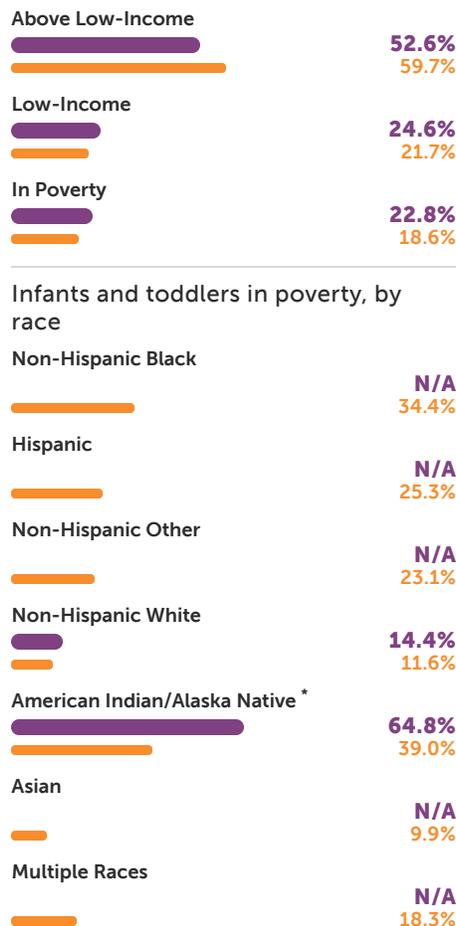

South Dakota is home to 36,397 babies, representing 4.1 percent of the state's population. As many as 47.4 percent live in households with incomes less than twice the federal poverty line (in 2019, about \$51,500 a year for a family of four), placing them

at economic disadvantage. The state's youngest children are diverse and are raised in a variety of family contexts and household structures.

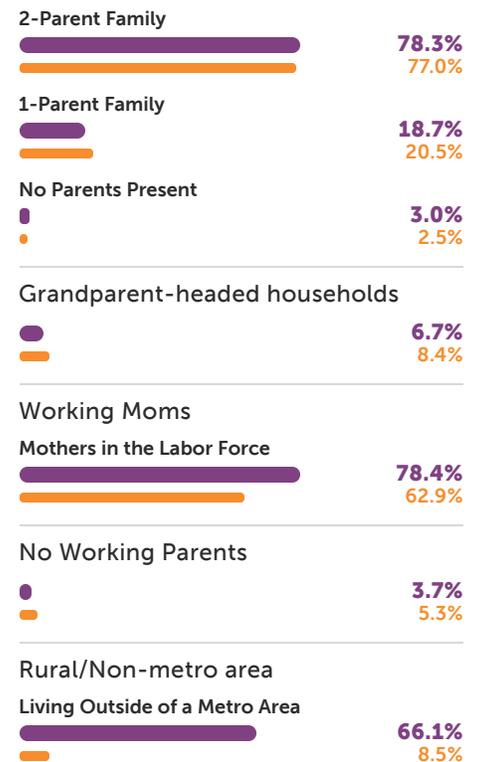

#### Race/ethnicity of infants and toddlers

#### Poverty status of infants and toddlers

#### Family structure

## How are South Dakota's babies faring in Good Health?

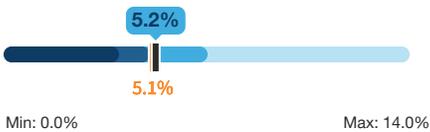

Supporting babies' and mothers' physical and mental health provides the foundation for infants' lifelong physical, cognitive, emotional, and social well-being. Babies' brains grow rapidly in the first years of life, and, in these early years, the brain works with other organs and organ systems to set the stage for subsequent development and health outcomes. Equitable access to good nutrition during the prenatal period and first years of life is key to ensure that babies receive the nourishment and care they need for a strong start in life. Strengthening equitable access to integrated, affordable maternal, pediatric, and family health care is also essential to meeting babies' and families' health and developmental needs.

South Dakota falls in the Improving Outcomes (O) tier for the Good Health domain. A state's ranking is based on indicators of maternal and child health, including health care coverage, prenatal care, birth outcomes, and receipt of recommended preventive care as well as food security, nutrition, and mental health. South Dakota performs better than national averages on key indicators, such as the percentages of babies breastfed at 6 months and babies receiving preventive medical care. The state is performing worse than national averages on indicators such as the percentages of babies receiving preventive dental care and babies receiving recommended vaccinations.

## Key Indicators of Good Health

● South Dakota ● National Avg

### Uninsured low-income infants/toddlers

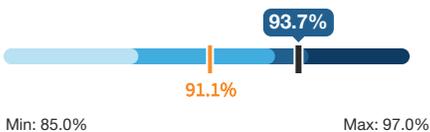

### High weight-for-length†

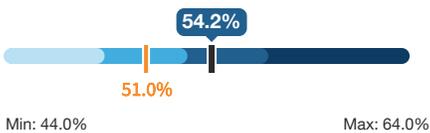

### Infant mortality rate (deaths per 1,000 live births)

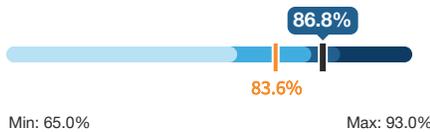

### Preventative medical care received

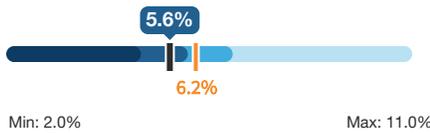

### Medical home†

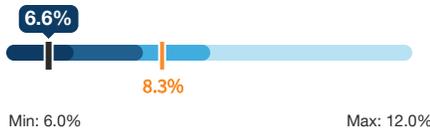

### Ever breastfed

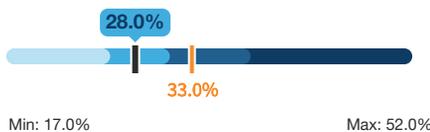

### Late or no prenatal care received

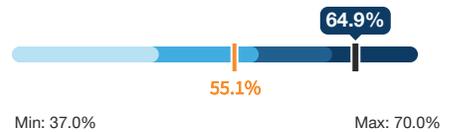

### Babies with low birthweight

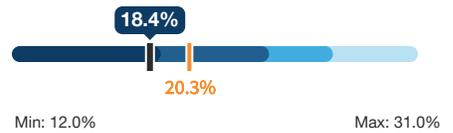

### Preventative dental care received

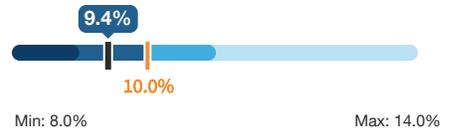

### Infants breastfed at 6 months

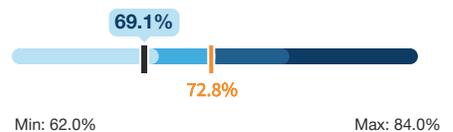

### Mothers reporting less than optimal mental health

### Preterm births†

### Received recommended vaccines

## Good Health Policy in South Dakota

Medicaid expansion state	No	✗
State Medicaid policy for maternal depression screening in well-child visits	Recommended	
Medicaid plan covers social-emotional screening for young children	Yes	✓
Medicaid plan covers IECMH services at home	Yes	✓
Medicaid plan covers IECMH services at pediatric/family medicine practices	Yes	✓
Medicaid plan covers IECMH services in early childhood education settings	No	✗
Pregnant workers protection†	No protections	
Postpartum extension of Medicaid coverage†	No law beyond mandatory 60 days	

†This indicator is not factored into the GROW tier rankings.

## How are South Dakota's babies faring in Strong Families?

Young children develop in the context of their families, where stability, safety, and supportive relationships nurture their growth. All families may benefit from parenting supports, but children and families of color face numerous challenges as a result of racism that impact their everyday life, which are exacerbated even more for children and families living in households with low income. Many policies can be designed to address these disparities by race, ethnicity, and income, including the provision of safe and stable housing, home visiting services, family-friendly employer policies, economic support for families with low income, and tax credits that benefit families with young children.

South Dakota falls in the Reaching Forward (R) tier of states when it comes to indicators of Strong Families. The state's ranking in this domain reflects indicators on which it is performing better than the national average, such as the percentages of babies living in crowded housing and families who report being resilient. South Dakota is doing worse than the national average on the percentage of babies who could benefit from home visiting receiving those services.

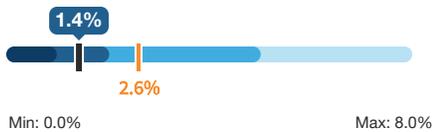

### Key Indicators of Strong Families

● South Dakota ● National Avg

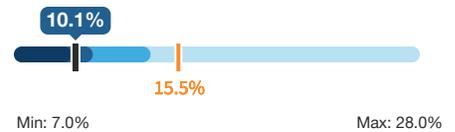

TANF benefits receipt among families in poverty

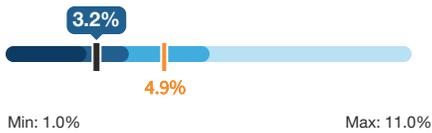

Housing instability

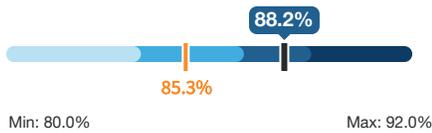

Crowded housing

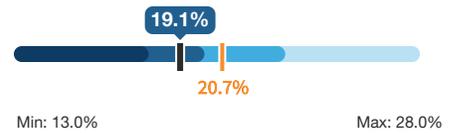

Unsafe neighborhoods

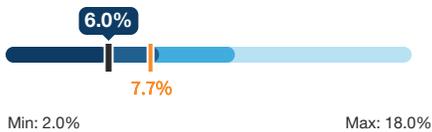

Family resilience

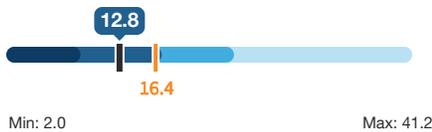

1 adverse childhood experience

# Positive Early Learning Experiences

## How are South Dakota's babies faring in Positive Early Learning Experiences?

Infants and toddlers learn through interactions with the significant adults in their lives and active exploration of enriching environments. The quality of infant and toddlers' early learning experiences at home and in other care settings can impact their cognitive and social-emotional development, as well as early literacy. High-quality early childhood care can strengthen parents' interactions with their children in the home learning environment and support parents' ability to go to work or attend school. Equitable access to high-quality care across factors like race, ethnicity, and income ensures all infants and toddlers have the opportunity for optimal development; however, disparities in access to high-quality care remain across many states and communities in the United States.

South Dakota scores in the Reaching Forward (R) tier for Positive Early Learning Experiences. The state's ranking in this domain reflects indicators on which it is performing better than the national average, such as the higher percentage of infants and toddlers who received a developmental screening. South Dakota is doing worse than the national average on indicators such as the lower percentage of parents who report singing songs or telling stories to their infants and toddlers every day.

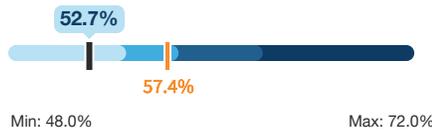

## Key Indicators of Positive Early Learning Experiences

● South Dakota ● National Avg

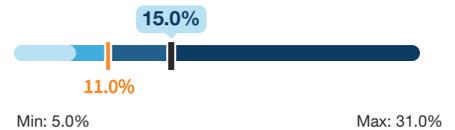

Parent reads to baby every day

Parent sings to baby every day

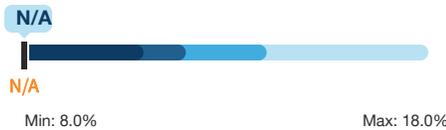

Percentage of income-eligible infants/toddlers with Early Head Start access

Cost of care, as % of income single parents

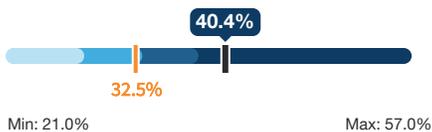

Cost of care, as % of income married families

Low/moderate income infants/toddlers in CCDF funded-care

Developmental screening received

Percentage of infants/toddlers receiving IDEA Part C services

# Positive Early Learning Experiences

## Positive Early Learning Experiences Policy in South Dakota
